Programme offers more than 650 courses to meet the needs of both deep and horizontal skills training for PMEs.

A new online learning platform that advocates a continuous upgrading mind set and one that offers a flexible learning approach was launched by e2i (Employment and Employability Institute) on Monday (October 5).

According to a media release by e2i, the platform, crafted by Parenthesis, offers more than 650 courses that furnish the need for both deep and horizontal skills training for Professionals, Managers and Executives (PMEs) to adapt to the rapidly-changing needs of the employment landscape.

Users will possess the flexibility to choose the type of courses they desire to attend, and enable the exchange of perspectives, and learning from experts in the various sectors.

The unveiling of the online learning platform is one of the schemes to bring together industry practitioners, employees and organisations.
